

Life Technologies E-Catalog-Additional Features

-D-Quotes and P-Quotes – Written by an Account or Sales Representative and are applied as promotional pricing after items are placed into the Shopping Cart. After placing items into your Life Technologies cart and prior to checkout, enter and apply the quote number in the View Cart screen to update pricing. D-quotes are typically short-term; P-Quotes contain long-term pricing and are potentially renewable.

-S-Quotes – Quotations prefixed by S are written by an instruments specialist and are for instruments only. The Quote/Promotion box is also used for loading S-quotes. Rather than placing items into your cart and applying a promotional code as above, start with an empty Shopping Cart and enter the S-quote number directly into the box and click Apply. Items within the S-quote will populate to the Life Technologies cart to process.

-CAB Quotes – For custom antibodies or other materials. The CAB team develops the quote based on customized needs provided by department and provides to end-user. Purchase via Free Text Shopping Cart; please attach the quote to the cart.

Email: customorders@lifetech.com

Life Technologies E-Catalog-Additional Features

-GeneArt – Departments may choose to use the GeneArt portal within the e-catalog or a Free Text Shopping Cart for gene syntheses purchases. Below is a reference guide for conducting purchases and/or managing projects for GeneArt within the e-catalog. Even if the department uses a Free Text Shopping Cart for the actual purchase, they may use the GeneArt portal within the e-catalog for overall project management.

For assistance with ordering GeneArt Synthesis, CRISPR, TALS, and RNAi services, contact: Abby Sukman, email abby.sukman@thermofisher.com, phone: 410-206-5669

-Service/Maintenance Agreements – Enter a Free Text Shopping Cart and attach the equipment maintenance agreement. Refrain from using the e-catalog for equipment service agreements.
