

Information in this file is supplemental and in many cases from the Amazon Business website - either through the help button or info buttons. Check the help resource on Amazon for updated info that may not be available here.

The field names in reports may or may not match the field name in Dashboards Filters. The table below lists the fields available for reports. The Filters fields have NA when it's not on the dashboard. This is typically due to the filter creating a formula for a different representation of the item.

**Filter List:**

- ASIN
- Average Order Size
- Brand
- Brand Code
- Buyer group ID
- Buyer ID
- Buyer Name
- Carrier Name
- Carrier Tracking #
- Category
