2.0 GENERAL OVERVIEW

2.1 Intent and Scope

This Request for Proposal (RFP) is issued to solicit proposals from qualified, experienced, licensed & insured, financially sound, and responsible firms to provide a Pest Management Program for the control, treatment and prevention of indoor pests including, but not limited to, cockroaches, ants, termites, bed bugs, occasional invading insects, rodents, and small vertebrates for University of Kentucky facilities, located in Lexington, Kentucky. The University has over 200 buildings (subject to change) that require varying levels of service. Due to patient areas being serviced, the contracted vendor will be required to sign and submit the University's HIPAA BAA (Attachment B).

The successful awardee(s) should furnish all supervision, labor, materials, products, and equipment necessary to accomplish the monitoring, trapping, application of pesticides, and pest removal components of an Integrated Pest Management program. The Successful awardee(s) should provide detailed, site-specific recommendations for any modifications needed to aid in pest prevention. Reporting should also be provided to the University representative documenting area changes in pest activity. All services provided by the Successful awardee(s) will be in compliance with relevant Federal, State, and local laws.

Services should be performed by qualified personnel who have passed the certification exam administered by the Division of Pesticides, Kentucky Department of Agriculture and should have a minimum of four (4) years' experience (including bedbug treatments) as field service personnel and have proof of customer service training. The successful awardee should have experience working in a variety of settings including but not limited to healthcare facilities, clinics, research facilities, animal quarters, student housing, and large office settings. The service personnel should attend either the University of Kentucky Pest Control Short Course, or similar multi-day training event on an annual basis to maintain their training at a professional level and be up to date in the latest techniques and methods of pest control. The successful awardee(s) should provide evidence of this training, sufficient Integrated Pest Management expertise, bedbug treatment and servicing as well as photocopies of the business' Pest Control License and Pesticide Applicator License for every Successful awardee(s) employee who will be performing on-site service under this contract. The successful awardee(s) should also be able to provide photocopies of pre-employment drug screens and background checks as technicians will be in close proximity of students, student families and personal belongings. The successful awardee(s) should encourage diversity and inclusion as the university houses a very diverse population many of whom have difficulty with the English language.

Initial Inspections

The successful awardee(s) should conduct a thorough initial inspection of each building to evaluate the pest control needs. Successful awardee(s) should identify and evaluate the pest management needs of university properties and provide a formal report to University representative(s). Access to all areas should be coordinated with the University representative(s). The inspection should identify pest issues, identification of pests, control

and treatment of problem areas in and around all University buildings. There will not be an initial inspection for Bedbugs as these will be handled on a case-by-case basis.

Record Keeping and Analysis

At the beginning of regularly scheduled visits the contracted technician should consult with The University representative(s) to review pest control work orders. The contracted technician should inspect the areas of any insect sightings and implement additional appropriate treatment in the affected areas. Contracted technician should submit detailed reports of programs initiated and analysis of on-going programs for quarterly evaluation by university officials. Any reapplication or alteration of the pest control program is to be noted.

The University aims to implement a comprehensive quarterly reporting system that illustrates the pest count per treated area. This will include trendlines to clearly depict whether the pest activity is trending downward, upward, or remaining stable. In the event of an upward trend, it is imperative that we engage our successful awardee(s) to conduct a thorough investigation and identify the root cause.

Parking

Parking permits are issued by the University's Transportation Services department. More information can be found at: https://transportation.uky.edu/service_vendor_or_by_calling_859-218-3446.

See section 7.1 for the full Scope of Services.

The selected pest control provider will be responsible for implementing preventive measures, conducting routine inspections, addressing emergency calls, employing effective pest management strategies, and documenting program efficacy.

2.3 University Information

Upon his arrival in 2011, President Eli Capilouto set an ambitious agenda to extend and enhance our role as Kentucky's land-grant and flagship research university. By focusing on infrastructure growth and improvement; creating opportunities for innovative teaching, learning and academic excellence; fostering a robust research enterprise; providing life-saving subspecialty care; empowering communities through service and outreach; and encouraging a transparent and shared dialogue about institutional priorities; the University of Kentucky will help ensure a Kentucky tomorrow that is healthier, wealthier and wiser than it is today.

Our mission is to advance Kentucky.

Founded in 1865 as a land-grant institution adjacent to downtown Lexington, UK is nestled in the scenic heart of the beautiful Bluegrass region of Kentucky. From its early beginnings, with only 190 students and 10 professors, UK's campus now covers more than 900 acres. The university enrolled

more than 32,000 students in Fall 2022 and has approximately 25,000 employees, including nearly 3,000 full-time faculty.

UK is one of a small number of universities in the United States that has programs in agriculture, engineering, law, fine arts and a full complement of health colleges including medicine and pharmacy, on a single campus alongside an academic health system, leading to groundbreaking discoveries and unique interdisciplinary collaboration.

The state's flagship university consists of 18 academic and professional colleges where students can choose from more than 200 majors and degree programs at the undergraduate and graduate levels. The colleges are Agriculture, Food and Environment; Arts and Sciences; Business and Economics; Communication and Information; Dentistry; Design; Education; Engineering; Fine Arts; Graduate School; Health Sciences; Honors; Law; Medicine; Nursing; Pharmacy; Public Health; and Social Work. These colleges are supported by a modern research library system.

Research at the University of Kentucky is a dynamic enterprise encompassing both traditional scholarship and emerging technologies. UK's research faculty, staff and students are establishing UK as one of the nation's most prolific public research universities. UK researchers were awarded more than \$452.9 million in extramural grant and contract funding in fiscal year 2022. Fifty-six percent of this funding comes from agencies in the federal government (\$256 million) such as the National Institutes of Health, National Science Foundation, Department of Energy, Department of Defense and numerous other federal, state and industry sponsors. Expenditures from research and development (R&D) activities at the university generate more than \$772 million in economic development across the Commonwealth of Kentucky and support more than 4,395 jobs.

With more than 70 research centers and institutes, UK researchers are discovering new knowledge, providing a rich training ground for current students and the next generation of researchers and advancing the economic growth of the Commonwealth of Kentucky. Several centers excel in the services offered to the public. The Gluck Equine Research Center is one of only three facilities of its kind in the world, conducting equine disease research.

The Center for Applied Energy Research (CAER) is internationally recognized for research in algae for carbon dioxide clean up, carbon materials, concrete and cement, emissions control in utilities, energy policy, fuels research, hydrogen, materials characterization and plant optimization.

Among the brightest examples of UK's investment in transformative research is the Markey Cancer Center. As a center of excellence and distinction at UK, Markey's robust research and clinical enterprise is the cornerstone of our commitment to Kentucky – fundamental to our success in uplifting lives through our endeavors and improving the general health and welfare of our state – burdened by the nation's highest rate of cancer deaths per 100,000 people. In 2013, Markey earned the prestigious National Cancer Institute-designation (NCI) – one of 68 nationally and the only one in Kentucky. The designation was renewed in 2018.

Both CAER and Markey are cornerstones of seven Research Priority Areas (RPAs) at the University of Kentucky. These areas — chosen based on local relevance, existing funding strength, sustainability and disciplinary scholarly diversity — focus UK's top research talent on the most pressing challenges confronting our state.

The University of Kentucky is the recipient of a Clinical Translational Sciences Award (CTSA) from the National Institutes of Health (NIH). As one of only 60 institutions with this research distinction, UK was awarded the CTSA for its potential in moving research and discovery in the lab into

practical field and community applications. The CTSA and NCI are part of a trifecta of federal research grants that includes an Alzheimer's Disease Center. UK is one of only 29 universities in the country to hold all three premier grants from NIH.

Established in 1957, the medical center at UK is one of the nation's finest academic medical centers and includes the university's clinical enterprise, UK HealthCare. Licensed for 965 beds across UK Albert B. Chandler Hospital, Kentucky Children's Hospital and UK Good Samaritan Hospital, the system is supported by a growing faculty and staff providing the most advanced subspecialty care for the most critically injured and ill patients throughout the Commonwealth and beyond. Since 2014, the number of patients served by the medical enterprise has nearly doubled, with more than 38,000 discharges in 2022.

UK Chandler Hospital includes the only Level 1 Trauma Center for both adult and pediatric patients in Central and Eastern Kentucky. In addition, UK HealthCare recently opened one of the country's largest robotic hybrid operating rooms and the first of its kind in the region. While the new patient care pavilion is the leading health care facility for advanced medical procedures in the region, our talented physicians consult with and travel to our network of affiliate hospitals so Kentuckians can receive the best health care available close to their home and never need to leave the Bluegrass for complex subspecialty care.

As of December 1, 2022, King's Daughters Medical Center, based in Ashland, Kentucky, officially became part of the University of Kentucky. King's Daughters Medical Center serves a 16-county region across Kentucky, Ohio and West Virginia. Its health system is composed of two acute-care hospitals totaling 465 licensed beds, more than 50 ambulatory centers and practice locations, a long-term care facility, medical transport company and six urgent care centers.

UK's agenda remains committed to accelerating the university's academic excellence in all areas and gaining worldwide recognition for its outstanding academic programs, its commitment to students, its investment in pioneering research and discovery, its success in building a diverse community and its engagement with the larger society. This commitment is all part of the university's mission as a 21st century flagship and land-grant research university. From its Nobel Laureates to cutting-edge work in addressing health disparities, and from the artistic wonders that stir souls to our scientific creativity that inspires minds, UK seeks a brighter future through the contributions of our faculty, staff, students and alumni.

We are the University of Kentucky. We are committed to advancing Kentucky in everything that we do.

SUSTAINABILITY

Sustainability is an institution-wide priority for the University of Kentucky. We strive to ensure that all activities are ecologically sound, socially just, and economically viable, and that they will continue to be so for future generations. This commitment also prioritizes the integration of these principles in curricula, research, athletics, health care, creative works, and outreach. This principled approach to operational practices and intellectual pursuits is intended to prepare students and empower the campus community to support sustainable development in the Commonwealth and beyond. The UK Sustainability Strategic Plan guides these efforts (<https://www.uky.edu/sustainability/sustainability-strategic-plan>).

2.4 Economic Inclusion and Procurement

The University of Kentucky is committed to serving as an advocate for diverse businesses and Kentucky located businesses. Diverse Business Enterprises (DBE) consist of minority, women, disabled, veteran and disabled veteran owned business firms that are at least fifty-one percent owned and operated by an individual(s) of the aforementioned categories. Also included in this category are disabled business enterprises and non-profit work centers for the blind and severely disabled. To be deemed a Kentucky located Business a company must have a physical facility located in the Commonwealth of Kentucky that is engaged in on-going business operations.

The University is committed to increasing the amount of goods and services acquired from businesses owned and controlled by diverse persons to 10% of all procurement expenditures. The University expects its suppliers to support and assist in this effort. The University is also dedicated to increasing the amount of goods and services acquired from Kentucky located companies to the greatest extent possible in support of our economic development efforts.

Among the University's goals for DBE participation in procurement are:

- To ensure the absence of barriers that reduce their participation.
- Educate vendors on "how to" do business with the University.
- Support diverse and Kentucky located vendors seeking to do business with the University in the areas of goods, services, construction, and other areas of procurement.
- Encourage participation of qualified diverse and Kentucky located vendors by directing them to agencies that can benefit from their product or service.
- Provide resources for diverse and Kentucky located vendors.
- Sponsor events to assist diverse and Kentucky located vendors in becoming active, responsible, and responsive participants in the University's purchasing opportunities.

For additional information regarding how diverse and Kentucky located suppliers may participate in this Request for Proposal, submit any questions to the Procurement Officer as indicated in Section 3.2 by the Deadline for Written Questions date.
