CCK-2563.30-4-24 CTC + AAC BP07 Core & Shell Group 1 ADDENDUM #5 July 1, 2024

IMPORTANT: BID AND ADDENDUM MUST BE RECEIVED BY: 07/11/2024 @ 3:00 P.M. LEXINGTON, KY TIME

Bidder must acknowledge receipt of this and any addendum as stated in the Invitation for Bids.

ITEM #1: BIDDER NOTICES

 The University is still reviewing the original stated requirement to use union carpenters for TC-03A.7 Concrete. Further clarification on the use of union carpenters will be specified in a later Addendum.

ITEM #2: UPDATES TO THE ORIGINAL BID DOCUMENTS

 Please refer to and incorporate within the offer the enclosed additional information from the project team.

Project	BP-07 Core and Shell	UK Project#	2563.3
		Champlin Project #	514-6926

This addendum provides information to clarify or adjust construction items which may affect any or all trade contractors. The original documents for the referenced project are amended as noted in this addendum and made part of said documents and shall govern the work covered by the Form of Proposal. All work to be in strict accordance with the terms, stipulations and conditions of contract documents.

CLARIFICATION:

Drawings with revision clouds have changes as described below. Changes to the luminaire schedule are in narrative form only. Those changes should be priced. Updated drawing and lighting specification will be issued in future addendum.

SUMMARY OF ATTACHMENTS

PART A - DRAWINGS:

			1. Advertisement for bid AB-2 (5) Project Schedule lists the time for substantial completion as 365 consecutive calendar days. During the pre-bid call it was mentioned that substantial completion for this bid package was sometime Q4 of 2026 but there was a slide showing September of 2026. In the project schedule I only see a date listed of 10/27/26 for substantial completion of the overall project. I see a BIM core & shell but I'm struggling to find specific dates as it pertains to this bid package and specifically TC26A.7 For instance TC26A.7 requires temporary electric and lighting to		10/26/2027 is the current projected substantial completion date. 9/20/2027 is the current targeted substantial completion date. Schedule will drive the substantial completion dates rather than the advertisement to bid. Temporary site lighting is to be provided by others. Temporary interior lighting of the floors shall follow the concrete activities in the schedule. Temp lighting of floors to be provided immediately after stripping of formwork and start of reshoring. 'Full' temporary electrical power for construction operations to be available no later than reshores being pulled for each floor. Temporary power for mechanical systems per the contract schedule. 15	45447	Thomas Darnell, Besco	2. To bid this package, we need detailed bills of materials including sizes and weights of all material that we are responsible for installing that will be furnished by others. TC26A.7 items 51-53 are weight / dimension specific. This complete BOM is also required to address item 70. Permitting required we know the values as it is based off a % of these furnished items as well.	Walsh / AEI	Estimated dimensions are on the drawings, with exception to the "shipping split" information, which will not be available until submittals are provided. Where this is not feasible or otherwise not complete, the C&S subcontractor shall correct the panels. Unit costs have been added to the Bid Breakdown form to account for possible changes. 17	45446	Dan Zornes, Glenwood	Will temporary smoke detectors need to be provided during construction?	Walsh	No. This is not a project requirement.	Released with Add 2	
18	45446		Note 6.J of the electrical scope relates to temp. power for the mechanical contractor and temp. conditioning of the project. Can more information be provided for this? A building of this size could require significant temp. power to achieve the proper conditioning.	Walsh	Subcontractor shall plan to power equipment for 18 months. See other RFIs for consumption concerns.	Released with Add 2	
19	45446	Dan Zornes, Glenwood	Please provide clarification to note 24 in the electrical scope. I do not see any reference to communication backbone, branches or pathways on the bid drawings nor a line item on the bid form. Also, page 10 states Low Voltage rough in is excluded			Released with Add 2

22	45447	ae Coulter, Schiller Hardwa	The doors schedule has just under 200 openings listed and the hardware specs have hardware set assignments for all openings on the door schedule, but plan page A-700 has a note between the door schedule sections of exterior doors and interior doors that states "Interior doors, frames, and assemblies are to be considered interior fit-out project scope and are included here for reference purposes only." -Based on this, should we only be pricing the roughly 20-25 openings listed on the "exterior" door schedule at the top left corner, and exclude all openings on the "interior" door schedules on the rest of the page? 					The foundation walls are laterally supported by the Level 01 slab and Level 00 slab on grade and grade beams. Before slabs are in place, backfill may be placed to about 4 feet high to install the perimeter drainage, but should not be placed higher until the Level 01 slab is in place. With Level 01 in place but no slab on grade, backfill may be placed to about 12 feet high and should be monitored to ensure there is no displacement of the base of the wall. Note that the service corridor "tunnel" slab on grade and top slab must be in place, since the outer west wall is not a retaining wall and relies on the main wall along Line 9 for lateral support at both top and bottom. At the garden, the battered wall is a retailing wall that supports the outer wall. Backfill may be placed full height when Level 01 is in place and the slab on grade is in place for at least two bays in from the wall. The slab on grade should extend from the wall to Line C, Line 6.9 by the elevators, and Line M, and be cast to the Linacc walls and south or west face of the columns. The slab on grade within the Linaccs may be cast later, since the vault walls and top will brace the main wall along Line 9. The retention system does not alleviate the backfill limits, since the backfill and compaction methods apply pressure to the wall. BUILDING DESIGN UTILIZES MIXED OCCUPANCY, OTHER AREAS ARE NOT INTENDED TO PROVIDE SERVICES SIMULTANEOUSLY FOR FOUR OR MORE INPATIENTS FOR PURPOSES OF HOUSING, TREATMENT, OR CUSTOMARY ACCESS BY INPATIENTS INCAPABLE OF SELF-PRESERVATION. THESE AREAS ARE SEPARATED FROM AREAS OF HEALTH CARE OCCUPANCIES BY CONSTRUCTION HAVING A MINIMUM 2-HOUR FIRE
- 18.2.5.2 DEAD-END CORRIDORS SHALL NOT EXCEED 30 FT (APPLIES TO LEVELS 0, 1, & 2) ANY VERTICAL OPENING SHALL BE ENCLOSED OR PROTECTED IN ACCORDANCE WITH SECTION 8.6
- UNLESS OTHERWISE MODIFIED BY 18.3.1.1 THROUGH 18.3.1.8 18.3.1.2 UNPROTECTED VERTICAL OPENINGS IN ACCORDANCE WITH 8.6.9.1 SHALL BE PERMITTED.
- 18.3.7.1 SUBDIVIDE EACH STORY USED BY INPATIENTS FOR SLEEPING OR TREATMENT INTO NOT LESS THAN TWO SMOKE COMPARTMENTS, EACH COMPARTMENT NOT TO EXCEED 22,500 SQ FT. LIMIT TRAVEL DISTANCE

FROM ANY POINT TO REACH A DOOR IN THE REQUIRED SMOKE BARRIER TO A DISTANCE NOT EXCEEDING
